Avoid Data Breaches

 Bookmark this page

Every organization has a responsibility to perform due diligence when it comes to their client and employee records and transactions. Data breaches result in several negative consequences for Des Moines businesses.

- Financial costs.
- Loss of public trust.
- Damaged brand reputation.
- Impact on future profits.
- Legal or regulatory consequences associated with breaches.

Considering the fact, a data breach costs small and medium businesses (SME), on average, \$120,000 per cyber incident, security is a task no business wants to ignore.
